

GORG D'ABISS

The waterfall Gorg D'Abiss is situated in Tiarno di Sotto, just 10 minutes from the water mill "Mulino dei Bugatini" along the stream Massangla. This waterfall, coming out of the rocks at the end of a canyon, creates a unique atmosphere. The waterfall Gorg D'Abiss is a fresh relief during summer, while during the winter it is surrounded by ice. Along the path through the woods, you can find a lot of small waterfalls that lead you to the waterfall Gorg D'Abiss. The water mill "Mulino dei Bugatini" stopped its activity during the Second World War. A pleasant walk from the village of Tiarno di Sotto, leads to the hidden Waterfall Gorg d'Abiss.

PARCO STORICO NATURALISTICO CASCATA FORTE AMPOLA

This short route, created in the area of the former Fortress of Ampola, allows you to rediscover a piece of history surrounded by a unique natural environment. The intent is to enhance the historical events that have characterized the Ampola Fortress, also highlighting the naturalistic aspects that characterize it. The outdoor cultural path is flanked by multimedia insights through the free broadband Wi-Fi network. The bridge and the footbridge follow the old bastion, cantilevered on one side over the Citta torrent and on the other over the Palvico torrent waterfall, offering truly suggestive and exciting views in an environment that has remained almost untouched.
